Why Moms

There is no more powerful force for change than mothers mobilizing to protect their children and their children's future.

Why Now

Climate change is the most critical challenge of our time, and it is critical we act to center the voices of those communities most impacted by the destructive effects of the fossil fuel industry.

Why Mothers Out Front

We build mom power. We are building an inclusive movement where mothers' voices are front and center. Members participate in the decision-making and development of climate action campaigns based on the needs of their communities and at the local, state and national level.

As a movement of moms, we prioritize:

OUR KIDS' FUTURE AND THEIR HEALTH.

Today, children are among the most vulnerable populations in terms of the health impacts of the polluting fossil fuel industry. We want all kids to inherit a livable climate and a healthy environment.

CLIMATE JUSTICE.

Climate change has a disproportionate impact on historically marginalized communities of color. While these communities contribute less to climate change, they are most likely to be on the receiving end of the devastating impacts of fossil fuel extraction and consumption. Climate justice is racial and economic justice. If we are to create a vibrant future for all kids, we need to ensure we are centering climate justice in our demands for action.

INTERSECTIONAL CLIMATE POLICY.

We have a once in a generation opportunity to remake our economy and build a livable future for our kids that moves away from fossil fuel dependence to renewable energy and that ensures water and air quality, safe schools, and a healthy environment. That requires bold change and it's why we are working to convince elected officials at all levels of our government that climate policy must be bold, comprehensive, and that it must center around climate justice.

A little more about us...

Tackling climate change can seem like an insurmountable task but when we work together it becomes doable. At Mothers Out Front, we engage in pushing for bold climate action through campaigns, advocacy, education, protest -whatever it takes - to push our local, state and national leaders to enact bold climate policy for our children's future.

Our movement is over 35,000 supporters strong with teams in nearly 40 communities across the country.

and we've won countless campaigns that helped move us from fossil fuel dependency to building a cleaner future for all children.
